review_status: Draft for Human Review

Synthetic Training Scenario

This is a fictional inspection-follow-up near-miss record for demonstration only. It does not describe a real distillation event, process condition, equipment failure, or corrective action.

Event Details

Field	Value
Event ID	NMR-PRG-DST-004
Event date	2025-09-03
Category	Inspection follow-up evidence gap
Affected assets	C-301, E-301
Source drawing	PCP-PID-002
Follow-up owner role	Reliability Engineer
Status	Follow-up Open

Observed Facts

A fictional inspection record links C-301 and E-301 to PCP-PID-002, but an open follow-up note does not include an assigned owner role. The record does not infer equipment health, cause, or process impact.

Immediate Non-Operational Actions

- Create an evidence-review task for the unassigned follow-up note.
- Retain the inspection record and P&ID reference together.
- Record the ownership decision once a reviewer assigns it.

Evidence Gap

The fictional inspection package contains an open follow-up note without an accountable internal role.

Lessons Learned

An inspection finding is not actionable knowledge until ownership, source evidence, and review state are explicit.
