review_status: Draft for Human Review

Synthetic Training Scenario

This is a fictional near-miss record for demonstration only. It does not describe a real plant event, alarm, analyser state, valve state, or environmental outcome.

Event Details

Field	Value
Event ID	NMR-PRG-ETP-001
Event date	2025-08-20
Category	Evidence-gap near miss
Affected assets	AAH-601, XV-603, AIT-601
Source drawing	PCP-PID-005
Follow-up owner role	EHS Reviewer
Status	Follow-up Open

Observed Facts

A fictional review found that the P&ID context for AAH-601 and XV-603 was available, while one supporting analyser-document reference lacked a complete reviewer/source-location record. The record does not assert an analyser condition, alarm event, valve action, or cause.

Immediate Non-Operational Actions

- Mark the incomplete reference as AI proposed or Needs Review in the evidence workspace.
- Preserve the drawing reference and the incomplete source record for reviewer inspection.
- Route the evidence gap to the assigned internal review role.

Evidence Gap

The fictional evidence package does not contain a fully attributable review record for the linked analyser documentation.

Lessons Learned

Asset context alone is not sufficient for a verified claim. A source location, review state, and owner must accompany any linked evidence.
