review_status: Draft for Human Review

Synthetic Training Scenario

This is a fictional communication near-miss record for demonstration only. It does not describe a real transfer, tank level, pump state, or dispatch event.

Event Details

Field	Value
Event ID	NMR-PRG-STO-003
Event date	2025-08-29
Category	Communication evidence gap
Affected assets	V-401, P-401, V-402
Source drawing	PCP-PID-003
Follow-up owner role	Shift Engineer
Status	Follow-up Open

Observed Facts

A fictional review found that V-401, P-401, and V-402 were consistently represented on the P&ID, while two linked record notes used different informal descriptions for the same transfer context. The record does not assert an operational deviation or equipment condition.

Immediate Non-Operational Actions

- Preserve both source phrases and mark the alias match as proposed.
- Route the asset-alias decision to a reviewer.
- Keep the storage P&ID context available beside the review task.

Evidence Gap

The fictional record package lacks a reviewed alias map that confirms both informal descriptions refer to the approved storage tags.

Lessons Learned

Consistent tags are necessary to connect handovers, inspections, and maintenance evidence. Alias resolution should remain reviewable.
