confidentiality: Internal Demo review_status:
Draft for Human Review**

Purpose

Provide a fictional demo reference for recording routine ETP observations and transferring evidence context between shifts. This excerpt is not a live operating procedure.

Scope

Applies to the documentation context around ETP-601, AIT-601, AAH-601, P-601, and XV-603 shown on PCP-PID-005.

Required Evidence

- Current drawing reference and revision identifier.
- Available analyser, alarm, pump, and outlet-valve documentation references.
- Open documentation gaps, unreadable records, and pending-review items.
- Name of the receiving role and handover timestamp.

Handover Checklist

- Confirm that the relevant P&ID context is linked to the asset record.
- Record whether supporting evidence is verified, proposed, missing, or unreadable.
- Identify unresolved documentation questions without inferring equipment state or cause.
- Attach source references for any maintenance or inspection record mentioned during handover.

Escalation and Recording Expectations

When an evidence gap concerns AIT-601, AAH-601, or XV-603, record the gap and route it through the approved site escalation

process. This excerpt does not define operational actions, alarm response, or control logic.
